

Barbed Wire

Barbed wire fences come from a variety of materials: Electro galvanized iron wire, hot-dip galvanized iron wire and PVC coated iron wire.

Features and Usage: Barbed Wires are wire products of great versatility as they allow to be installed over wire fences for small farms and sites. Barbed wire is a product recommended for the construction of strong and lasting fencings. It is extremely adapted to control heavy and wild animals. Barbed wire can be widely used as accessories for woven wires fences to form a fencing system or security system. It is called barbed wire fences or barbed obstacles when it is used simply by itself along the wall or the building to give a kind of protection. Barbed wire is also written as barbed tape as it is always used in a line to form a kind of tape.

1. Single Twist Barbed Wire
