

### **Double Loop Decorative Fence**

### **Double Loop Welded Mesh Panels:**

The welded mesh panels of double loop fence have loops at the top and bottom edge of panel. The posts with plastic caps connect with the panels while retaining high rigidity. Few accessories with expand screw ensure the easy installation.

### **Roll Top Welded Mesh Panels:**

The feature of the roll top fence is acting as horizontal supports spanning between the posts. The open mesh configuration is also decorative in appearance allowing excellent visibility.

### **Specification:**

Wire Diameter	1mm – 10mm Or it can be your choice.
Opening Size	50mm – 200 mm

	Or it can be your choice.
The length can be your choice.	
The length can be your choice.	

**Forms of corrosion resistance** include electric galvanizing, hot-dipped galvanizing, PVC spraying and PVC coating. Welded mesh panels are PVC coating after galvanizing. Color coating usually is green and white, other colors are available.

**Double Loop Fence Advantages:**

**1. Attractive appearance**

The double loop and roll top welded mesh panels are extremely decorative and elegant while retaining high quality, low maintenance and performance.

**2. Built in rigidity**

The rolled beam profile at the top and bottom edge of each panels results in maximum rigidity.

**3. Longevity**

The polyester coating is able to guarantee longevity. Different colors can make the fence more attractive.

**4. User Friendly**

Double loop fencing and roll top fencing utilize friendly top "rolled" edges for enhanced safety and rigidity.

**Double Loop Fence Application:**

Used for park, private gardens and parks, playgrounds, plays areas, pedestrian zone and public restriction area.
