

PVC Coated Wire

PVC Coated Wire is manufactured with quality iron wire. PVC is the most popular plastic for coating wires, as it is relatively low in cost, resilient, fire retardant and possesses good insulating properties.

PVC Coated Wire Features: PVC coated iron wire offers excellent corrosion resistance, anti-aging property and longer service life compared with common galvanized iron wire.

Common colors available for PVC coated wire are green and black. Other colors also available on request.

PVC Coated Wire Application: The most popular use for PVC coated wire is in the construction of chain link fences for industrial security fences, freeways and tennis courts. It is also used in other applications such as coat hangers and handles.

Core Diameter	0.6mm-4.0mm BWG 23-8	Outside Diameter	0.9mm-5.0mm BWG 20-7
Note: PVC coating, the lowest coating 0.4mm			
Tensile Strength: 30-75kg/mm ²			
Color: Green, Blue Yellow Orange, Gray and so on.			
Packing: Lined with pvc strips and wrapped with PVC orthessian cloth.
