

Square Wire Mesh

We can produce square wire mesh, from 3x3mesh to 60x60mesh. It is used as window screening, safety guards in machinery enclosures, also in filtering liquid and gas, sieving grain, and so on.

Square iron wire mesh is woven and made of high quality low carbon steel wire. It has fine features of neat, precise and sturdy structure, durable and strong rust-resistance and fine anti-corrosiveness. It's widely used in industry, agriculture, building, house fencing and so on.

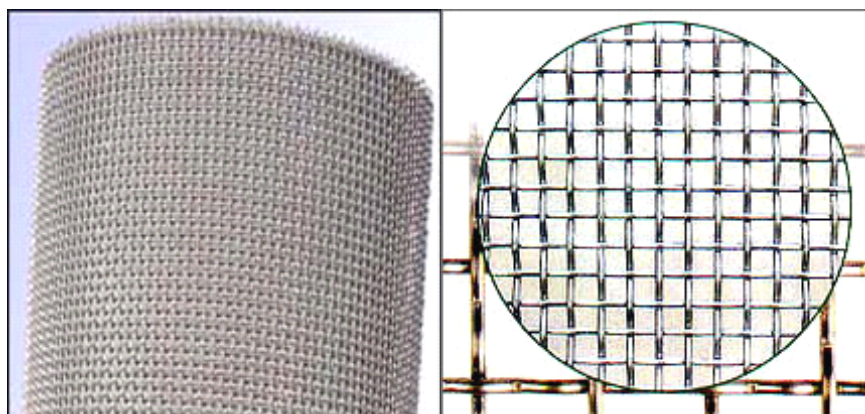

PRODUCTS SCOPE:

Hot-dip galvanized after weaving wire mesh

Hot-dip galvanized before weaving wire mesh

Electro galvanized before weaving wire mesh

Electro galvanized after weaving wire mesh
